Ahmad Marzouk

Full Stack Developer — NestJS & Next.js

aggamal98@gmail.com +201149560988 Egypt, Beni Suef https://github.com/AGemy12

https://my-protfolio-seven-phi.vercel.app/

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building and shipping end-to-end web applications using NestJS and Node.js on the backend and Next.js, React on the frontend. Designs modular REST APIs, relational and document data models (PostgreSQL, MongoDB) with Prisma, Mongoose, JWT authentication with guards and role-based access control, Redis caching, and Docker-based delivery workflows. Delivers scalable, high-performance and SEO-optimized user interfaces with Next.js (App Router, SSR, SSG) and Tailwind CSS. Experienced in working directly with business stakeholders, owning features from requirements to production, and writing clean, maintainable and reusable code.

SKILLS

Frontend Development
- Next.js (App Router, SSR, SSG)
- React.js
- Vue.js, Nuxt.js
- HTML5, CSS3, JavaScript (ES6+)
- SASS / SCSS
- Tailwind CSS

Backend Integration
- RESTful APIs
- API Integration (Laravel PHP, Node.js)

AI-Assisted Development
- Claude & Codex
- AI-powered code generation and debugging
- Prompt engineering for frontend workflows
- Using AI tools to improve productivity and task delivery

Performance & Best Practices
- SEO Optimization
- Performance Optimization
- Clean & Maintainable Code
- Reusable Components

Tools & Workflow
- Git & GitHub
- Docker

Technical Skills
Backend: NestJS, Node.js, TypeScript, REST API design, modular architecture, JWT authentication, guards & role-based access control (RBAC), DTOs & validation, middleware & interceptors
Databases & ORMs: PostgreSQL, MongoDB, Prisma, TypeORM, Mongoose, Redis, data modeling
Frontend: Next.js (App Router, SSR, SSG), React.js, Vue.js, Nuxt.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, SASS/SCSS, Shadcn UI
DevOps & Tools: Docker, Docker Compose, Git & GitHub, Postman, Vercel
AI-Assisted Development: Claude, Codex, AI-assisted code generation and debugging, prompt engineering
Practices: Clean code, reusable components, performance optimization, SEO optimization, responsive design, code review, cross-functional collaboration

PROFESSIONAL EXPERIENCE

Full Stack Developer2022 – Present
DeyarTech (deyartech.com) — Remote
- Develop and maintain company products end to end: data modeling, REST API layer, authentication and role-based access, and the client applications built on top of them.

- Translate business requirements into shipped features in collaboration with design and business stakeholders.
- Maintain clean, modular and reusable code, applying performance optimization and cross-browser compatibility across all products.

DeyarTech — Property Management Platform

- Building a scalable property management platform end to end: backend modules and data models, REST APIs, and dynamic dashboards on the client side.
- Implemented authenticated, role-based access for owners, tenants and administrators, with dynamic data flows between services and the application.
- Applied caching, performance optimization and SEO best practices across the platform.

Nemmra Platform

- Developed full-stack features and integrated them with the platform's REST API layer, covering authentication, dynamic content and data rendering.
- Built responsive layouts and optimized rendering performance across devices.

CMT Digital — Corporate Website *(cmt-azure.vercel.app)*

- Designed and delivered the complete corporate website, from layout structure to deployment.
- Ensured branding consistency, responsive behavior and a clean user experience.

Diyarsco — Corporate Website *(diyarsco.com)*

- Built and maintained the company website, including layout structure, visual design and content management.
- Ensured responsive behavior and usability across all devices.

Full Stack Developer (Freelance)2021 – Present

Self-employed — Remote

- Deliver complete web solutions for clients: database design, REST API services, authentication and authorization, and frontend applications.
- Manage projects independently, from requirements gathering through delivery, deployment and post-launch support.

Alarabify — Educational Platform

- Built an end-to-end educational platform with role-based dashboards for Admin, Teacher and Student users.
- Implemented the API integration layer for lessons, subscriptions, messaging and real-time notifications.
- Integrated live online sessions and built responsive screens bound to dynamic backend data.

Itqan for Quran — Website

- Built a responsive, SEO-focused website with modern, reusable UI components.
- Connected content, forms and interactive sections to backend endpoints, and optimized the structure for performance and accessibility.

Best Clean — Business Website *(best-cleanteam.com)*

- Delivered the full website for a cleaning services company, including service pages and request forms.
- Implemented responsive design and on-page SEO, and handled deployment and handover.

EDUCATION

Bachelor of Engineering – Mechanical Power Engineering
Al-Azhar University Graduation Year: 2022

LANGUAGES

- Arabic — Native
- English — Professional working proficiency
